

“Our aim is to provide a comprehensive solution to our valuable dairy customer base, providing a wide range of products including cultures, natural colours and stabilisers.”

Overview

Lake Foods focusses on specialty ingredients for the dairy, wine and food industries.

Our aim is to provide a comprehensive solution to our valuable dairy customer base, providing a wide range of products including cultures, natural colours and stabilisers.

Lake Foods has two regional office, one in Linbro Park, Johannesburg and the other in Cape Town.

We recognize the need to stay abreast of worldwide standards and offer a full range of test systems, in combination with the technical support that allows our customers to compete successfully in the global market.

The Linbro office is equipped with a test kitchen and pilot plant, which allows Lake Foods to perform trials for its customers.

Our complete test system range is as follows:

Antibiotic Test Kits

Microbial Tests:

Copan Test (CH ATK) Single Test
Copan Test (CH ATK) Multiple Test
These tests are based on inhibition of microbial growth, take 3 hours to perform and are able to detect β -lactams, tetracyclines and sulphonamides simultaneously.

Rapid Tests:

Betastar (based on receptor assay)
This test is very fast, with an incubation time of only 5 minutes, is highly sensitive and detects the β -lactam group of antibiotics.

Bacteriological Testing

3M Petrifilm

A range of sample-ready plates that are uniquely designed to offer you time savings, increased productivity, reliability and most of all, greater overall efficiency.

3M Petrifilm supplies accurate results in three easy steps:

1. Inoculate
2. Incubate
3. Count

Products in the 3M Petrifilm range are:

Total Plate Count
e-coli / Coliform
Yeasts and Moulds
Listeria Environmental
Quick Swabs
Swabs for Hygiene Management
